About Swedish Covenant Medical Group

Our philosophy is simple: We provide the best care when we provide it together.

With 180 employed physicians and advanced practice providers in over 20 specialties, Swedish Covenant Medical Group (SCMG) is a multi-specialty group practicing in association with Swedish Covenant Hospital. In addition to holding various roles on the hospital's main campus and satellite offices, the group operates the Chicago Brain & Spine Institute, Swedish Skin Institute and Immediate Care Centers and has medical education responsibilities. As leaders in their respective fields, our providers use a team approach to develop treatment plans that are tailored to patients' unique needs.

Swedish Covenant Hospital has served Chicago's north and northwest communities for more than 130 years. As one of the few independent academic hospitals in Chicago, Swedish Covenant Hospital is proud to offer a unique work environment with the advanced resources providers need to deliver the highest quality care to their patients.
